- C. होली से
- D. मांडवरा से

48. ट्रांजिस्टर का उपयोग सबसे पहले किस पीढ़ी के कंप्यूटर में शुरू हुआ था?

- A. पहली पीढ़ी
- B. दूसरी पीढ़ी
- C. तीसरी पीढ़ी
- D. चौथी पीढ़ी

49. "मुख्यमंत्री राशन आपके द्वार" योजना के संबंध में कौन सा कथन सत्य नहीं है?

- A. यह योजना 89 आदिवासी विकास खंडों में लागू है।
- B. यह योजना ग्राम मुख्यालय पर लागू नहीं है।
- C. इस योजना में राशन परिवहन हेतु वाहन क्रय के लिए ऋण के लाभार्थी अनुसूचित जनजाती वर्ग के होंगे।
- D. इस योजना के अन्तर्गत पांच गांवों का एक सेक्टर निर्धारित किया जाता है।

50. भारत वन स्थिति रिपोर्ट 2023 के अनुसार मध्यप्रदेश के कौन से जिले में वन क्षेत्र का (%) सबसे कम है?

- A. शाजापुर
- B. रतलाम
- C. उज्जैन
- D. अगर मालवा

45. Malati Madhav was written by-

- A. Bharthari
- B. Bhavbhuti
- C. Kalidas
- D. Banabhatta

46. ----- has achieved the historic feat of establishing India's first modern, self-sustaining Gaushala with a state-of-the-art compressed Biogas (CBG) plant.

- A. Modern Gaushala, Bhopal
- B. Shri Gopal Gaushala, Ratlam
- C. Shree Govardhan Gaushala, Indore
- D. Adarsha Gaushala, Gwalior

47. The song "Sajnai-Fagnai" sung by the Korku tribe is associated with-

- A. Marriage
- B. Engagement
- C. Holi
- D. Mandwara

48. In which generation of computers, the use of transistors was first started?

- A. First generation
- B. Second generation
- C. Third generation
- D. Fourth generation

49. Which statement is not true regarding the "Mukhyamantri Ration Aapke Dwar" Yojna?

- A. This scheme is implemented in 89 blocks.
- B. This scheme is not applicable on village headquarters.
- C. Beneficiaries for loan to purchase vehicles for ration transportation under this scheme will be from the Scheduled Tribe category.
- D. Under this scheme, a sector of five villages is determined.

50. According to the India State of Forest Report 2023, which district of Madhya Pradesh has the lowest (%) of forest area?

- A. Shajapur
- B. Ratlam
- C. Ujjain
- D. Agar Malwa

SECTION-'B'

Animal Husbandry and Veterinary Science

51. Tetrasomic is a common type of aneuploidy and it can be represented by the chromosomal formula -----.
- $2n-2$
 - $2n+2$
 - $2n-1$
 - $2n+1$
52. The intravenously administered barbiturate anaesthetics are not preferred to perform caesarean section because they cause-
- Aplastic anaemia in neonates after birth
 - Nephrotoxicity in foetus and may produce water retention
 - Ocular toxicity in foetus and may lead to blindness
 - Depression in foetus and may produce mortality up to 100%
53. The diffusion of technologies in Madhya Pradesh State is done through the network of KVKs under the aegis of ATARI, Zone-IX, is located at-
- Bhopal
 - Jabalpur
 - Indore
 - Gwalior
54. In dairy cattle, estrous cycle control is most effectively done by-
- GnRH antagonist
 - $\text{PGF}_{2\alpha}$ and its analogs
 - Both A and B
 - None of the above
55. The fraction of an orally administered dose that reaches the systemic circulation as intact drug, taking into account both absorption and local metabolic degradation is called as-
- Half-life
 - Bioequivalence
 - Bioavailability
 - None of the above
56. 'The Kaira District Milk Producer' Cooperative is now popularly known as-
- Mother Dairy
 - Amul
 - Himul
 - Sanchi
57. The housing system in which animals always tied inside the house on platform and secured by neck chain or rope except for some time during cleaning of house when the animals are let loose in an open area?
- Open housing system
 - Loose housing system
 - Stanchion barn system
 - Folding units system

58. An amphoteric polyene antibiotic namely, amphotericin-B interacts-
- With microtubule and interferes with spindle formation in dividing fungal cells.
 - With membrane phospholipids and alters the permeability of fungal cells.
 - With membrane ergosterol and alters the permeability of fungal cells.
 - With DNA gyrase enzyme and arrests the DNA synthesis in fungal cells.
59. Award launched by Government of India to encourage farmers, co-operative societies & others-
- Kamdhenu
 - Rashtriya Gopalak
 - Gopal Ratna
 - Livestock Innovator
60. According to Wilson and Gallup (1955), the first step in teaching-learning process is-
- Desire
 - Interest
 - Conviction
 - Attention
61. Name the first synthetic dairy cattle breed registered by NBAGR, Karnal-
- Sunandini
 - Karan Swiss
 - Frieswal
 - Karan Fries
62. In bone meal, ideal phosphorus and calcium ratio should be-----
- 2:1
 - 1:2
 - 2:3
 - None of the above
63. In 2022-23, the percentage of gross value added (GVA) of livestock sector to total GVA of India is-
- 5.50
 - 3.50
 - 7.50
 - 8.0

64. How do ionophores feed additives decrease methane production in the Rumen?
- By inhibiting Propionate producing Bacteria
 - By increasing the Acetate : Propionate ratio
 - By affecting the electrolyte production in Methanogenic Bacteria
 - By promoting Biohydrogenation
65. During cleaning and sanitization of dairy equipments ----- alkalis are used to saponify fat while ----- alkalis are used to dissolve protein.
- Weak, Strong
 - Strong, Weak
 - Weak, Weak
 - Strong, Strong
66. Among the Bacterial species mentioned below, the one used for the determination of available methionine in protein quality assessment-
- Saccharomyces cerevisiae*
 - Streptomyces cacaoi*
 - Bacillus subtilis*
 - Streptococcus zymogens*
67. Metabolic nonfebrile disease of the dairy cows that mostly affects after calving is-
- Ketosis
 - Johne's disease
 - Milk fever
 - None of the above
68. Puppet show is categorized as ----- type of extension teaching aid.
- Projected visual aid
 - Non-projected visual aid
 - Non-projected audio-visual aid
 - Projected audio-visual aid
69. As the environmental temperature decreases, an animal's heat production increases. However, this increase becomes limited at a certain point beyond which, no further rise in heat production is possible. What is this point called as?
- Upper critical temperature
 - Lower critical temperature
 - Summit metabolism
 - Thermoneutral zone

70. Annual Buffalo race in Karnataka State-
- Polo
 - Jallikattu
 - Kambala 
 - Manju Virattu
71. Kellner a German Scientist published 'starch equivalents system' in 1907 that was based upon-
- Digestible protein, Fat and carbohydrates
 - Net energy and digestible true protein
 - Dry matter and digestible crude protein
 - Digestible energy and metabolizable energy
72. A system of farming in which 50% or more income of the receipts are obtained from single source is called as-
- Diversified farming
 - Mixed farming
 - Specialised farming
 - Collective farming
73. Which of the following is not an objective of National Livestock Mission (NLM)?
- Employment Generation
 - Entrepreneurship Development
 - Promoting Livestock Insurance
 - The NLM was launched in 2010 by Ministry of Agriculture and Farmers Welfare
74. Excess feeding of urea in Ruminants results from grossly elevated rumen ammonia level of -----.
- 65 mg/100 ml rumen liquor
 - 70 mg/100 ml rumen liquor
 - 75 mg/100 ml rumen liquor
 - 80 mg/100 ml rumen liquor
75. A semi-synthetic derivative of oxytetracycline and is the most lipid soluble among all tetracycline class of antibiotics is-
- Chlortetracycline
 - Demeclocycline
 - Minocycline
 - Methacycline

76. In ----- method of egg preservation, eggs are exposed for a short time to the direct action of sulphuric acid.

- A. Water glass
- B. Beeswax
- C. Reinhard
- D. Lime water

77. -----is not a cause of fat separation in evaporated milk.

- A. Inadequate homogenization pressure
- B. Storage at high temperature
- C. Improper handling during storage
- D. Addition of sucrose before fore warming

78. In embryo transfer technology, denudation of cumulus cells is done with-

- A. 0.1% Hyaluronidase
- B. 10% Hyaluronidase
- C. 5% Hyaluronidase
- D. 20% Hyaluronidase

79. During processing of tissues for histology, clearing can be achieved by which reagent?

- A. Formalin
- B. Ethanol
- C. Xylene
- D. Paraffine

80. Match the column.

- | | | |
|-----------------|-----|------------------------|
| (a) Lung fluke | (1) | Trypanosoma equiperdum |
| (b) Dourine | (2) | Trypanosoma evansi |
| (c) Blood fluke | (3) | Schistosoma |
| (d) Surra | (4) | Paragonimus westermani |

- A. a-4, b-1, c-2, d-3
- B. a-4, b-1, c-3, d-2
- C. a-4, b-2, c-1, d-3
- D. a-2, b-1, c-4, d-3

81. Which of the following is a contraindication for electrotherapy in animal patients?

- A. Muscle atrophy
- B. Neurological deficits
- C. Post-Operative pain
- D. Open wounds

82. Maternal dystocia is more common in which animals?
- Horses and Swine
 - Dairy cattle and Sheep
 - Goats and Llamas
 - None of the above
83. Possible genetic factors causing genetic correlation among characters-
- Environmental factors affects both traits equally
 - The traits are controlled by completely independent genes
 - Both traits are influenced by the same set of genes
 - Selection pressure is applied only to one trait
84. If an individual is mated to a number of individuals taken at random from the population, then its breeding value exceed how much of the mean deviation of the progeny from the population mean?
- Two times
 - Remains unchanged
 - Three times
 - Four times
85. The characteristic "bitter almond smell" to exhaled air indicates likelihood of poisoning by-
- Nitrate
 - Salt poisoning
 - Hydrocyanic acid
 - Abrus Precatorius
86. The antineoplastic drugs are often used in combination with surgery and/or, radiotherapy. All the followings are mitotic inhibitor class of antineoplastic drugs except-
- Paclitaxel
 - Vincristine
 - Vinblastine
 - Methotrexate
87. Indigenous plant medicines maintain optimal health and vitality. Plant medicine having anti-ulcerogenic effect and works by enhancing mucosal barriers to gastric acid diffusion is-
- Leptadenia reticulata
 - Rauvolfia Serpentina
 - Glycyrrhiza glabra
 - Adhatoda vasica

88. In general, DNA viruses mature in the ----- of the host cell whereas RNA viruses replicate in the-----

- A. Nucleus, Cytoplasm
- B. Nucleus, Nucleoplasm
- C. Nucleus, Ribosomes
- D. Cytoplasm, Nucleus

89. In Bovine milk, whey (serum) protein represents ----- percentage of total protein.

- A. 05
- B. 15
- C. 30
- D. 20

90. The organelle acting as the site of final stages of synthesis and package of secretory products of the cell is-

- A. Ribosomes
- B. Endoplasmic reticulum
- C. Peroxisomes
- D. Golgi apparatus

91. ----- represents all the activities that are aimed at detecting changes in the epidemiological parameters of a specified disease-

- A. Surveillance
- B. Survey
- C. Census
- D. Monitoring

92. Mallein test is used for diagnosis of-

- A. Leptospirosis
- B. Listeriosis
- C. Glander
- D. Actinomycoses

93. For determination of total Ash content in a feed sample, the procedure followed in a feed analytical laboratory is -----.

- A. Kjeldahl method
- B. Drying of feed sample at 100°C in Hot air oven for 12 hrs.
- C. Combustion of feed sample at 600°C in muffle furnace for 2 hrs.
- D. Soxhlet extraction of feed sample in Soxhlet apparatus for 8-16 hrs.

94. Clonorchiasis is an example of Metazoonoses type-
- I
 - II
 - III
 - IV
95. Specimen to be collected in suspected anthrax case-
- Liver biopsy
 - Ruminal fluid
 - Intestinal content
 - Thick blood smear
96. Effective vaccine must have following critical properties-
- Property - I : Antigen must be delivered efficiently so that antigen-presenting cells can process antigen and release appropriate cytokines.
- Property - II : Both T & B cells must be stimulated so that they generate large numbers of memory cells.
- Only Property I is correct
 - Only Property II is correct
 - Both Properties are correct
 - Both Properties are incorrect
97. Under which Section of PCA, 1960 euthanasia of severely injured or diseased animal is permitted?
- 11
 - 13
 - 34
 - 35
98. For better hatchability, the carbon dioxide (CO_2) concentrate inside poultry egg incubator should not exceed more than ----- percent.
- 1.0
 - 0.7
 - 0.5
 - 0.9
99. Thiamin deficiency occurs in ruminants when ruminal synthesis decrease or when thiamin is hydrolysed by thiaminase in the rumen. This condition is known as ----- in USA.
- Chastek Paralysis
 - Cerebro cortical necrosis
 - Polioencephalomalacia
 - None of the above

100. For a given population quantitative traits often shows-
- A fixed number of distinct phenotypic classes
 - A bell shaped, normal distribution of phenotypic values
 - Complete dominance of one allele over another
 - No variation among individuals
101. In butter making, excessive washing of butter, and low diacetyl content in butter causes----- flavour defect.
- Stale
 - Flat
 - Bitter
 - Fishy
102. For Khoa making ----- milk is preferred, as it yields final product with soft and loose body with granulation in the texture.
- Buffalo
 - Cow
 - Mixed
 - Skimmed
103. The larval form of Taenia Solium is-
- Taenia tenuicollis*
 - Hydatid
 - Cysticercus cellulosae*
 - Cysticercus Bovis*
104. What is the main focus of the Rashtriya Gokul Mission (RGM) being implemented by Government of India?
- Improving Buffalo meat exports.
 - To promote Crossbred Cows numbers.
 - To reduce dependence on artificial insemination coverage.
 - Conservation and promotion of indigenous Cattle & Buffalo.
105. As per drug & cosmetic act, 1940 drug made to appear of better or greater therapeutic value than really it is, the drug is considered as-
- Adulterated
 - Spurious
 - Misbranded
 - Cosmetic

106. The transducer which contains a single crystal which oscillates or rotates to produce a fan shaped beam is known as-

- A. Linear array
- B. Sector
- C. Convex
- D. Concave

107. The first Krishi Vigyan Kendra was established at-

- A. Karnal
- B. Jabalpur
- C. Puducherry (Pondicherry)
- D. Hyderabad

108. Under which act is cruelty to animals prohibited in India?

- A. Wildlife Protection Act, 1972
- B. Prevention of Cruelty to Animals Act, 1960
- C. Indian Penal Code, 1860
- D. Environment Protection Act, 1986

109. What is the primary cause of Ketosis in dairy animals?

- A. Excess protein intake
- B. Deficiency of dietary calcium
- C. High glucose demand and fat mobilization
- D. Excess consumption of roughages

110. Foot and mouth disease is caused by Aphthovirus belonging to ----- family.

- A. Retroviridae
- B. Flaviviridae
- C. Rhabdoviridae
- D. Picornaviridae

111. Opaque projector is also known as-

- A. Overhead projector
- B. Slide projector
- C. Epidiascope
- D. Movie projector

112. Treatment of "lead toxicity" involves both specific and supportive therapies. The followings are the antidotes for the treatment of "Lead toxicity" in domestic animals except-

- A. Dimercaprol
- B. D-penicillamine
- C. Calcium Disodium Edetate
- D. Ammonium tetrathiomolybdate

113. The religious deity who use crow as his vehicle-
- Karthikeya
 - Ayappa
 - Krishna
 - Saturn
114. Which term describes the first milk produced by mammals after giving birth, rich in antibodies?
- Whey
 - Casein
 - Colostrum
 - Lactose
115. The expanded form of acronym 'BLUP' commonly used in animal breeding is-
- Biological Linear Update Programme
 - Best Lineage Understanding Programme
 - Best Likelihood Uniform Prediction
 - Best Linear Unbiased Prediction
116. The figure obtained by subtracting total cost from total return is-
- Gross farm income
 - Rate of return
 - Marginal cost
 - Net farm income
117. What is not included as a characteristic feature of shock?
- Systemic hypotension
 - Polyurea
 - Cellular hypoxia
 - Dysfunction of cells, tissues
118. On the basis of chemical structure and duration of action, the long acting local anaesthetic containing amide linkage with 3-4 hours of duration of action is-
- Procaine
 - Lidocaine
 - Bupivacaine
 - Proparacaine
119. During postmortem examination of carcasses, age of bruise can be determined by ----- test.
- Iodine
 - Boric Acid
 - Malachite Green
 - Bilirubin
120. Dyes of Sudan group are usually used as staining for-
- Polysaccharides
 - Nucleic acids
 - Proteins
 - Fats

121. Name the selection method where a highly inbred line is selected as a 'tester line' and a large number of individuals of a line are tested in crosses with tester line having good General Combining Ability (GCA)
- Direct Selection
 - Reciprocal Recurrent Selection
 - Individual Selection
 - Recurrent Selection
122. What is the defining characteristic of elective surgery?
- Always an emergency
 - Must be done immediately
 - Performed without anaesthesia
 - Can be postponed safely
123. In which of the following the part of the oviduct, egg remains for longest time during the process of egg formation?
- Vagina
 - Isthmus
 - Magnum
 - Uterus
124. During mitosis, which phase is associated with condensation of chromatin into twisted filamentous threads?
- Telophase
 - Anaphase
 - Metaphase
 - Prophase
125. The refractive index of milk is determined at ----- °C.
- 05
 - 10
 - 20
 - 04
126. Consider the following pairs-
- | <u>Drug</u> | <u>Class</u> |
|----------------|------------------|
| (1) Azaperone | (1) Tranquilizer |
| (2) Zolazepam | (2) Sedative |
| (3) Romifidine | (3) Opioid |
- Which of the pairs given above is/are correctly matched?
- 1 & 3
 - 1 & 2
 - 1, 2 & 3
 - 3 only

127. The inbreeding coefficient (F) given by Sewall Wright in animal breeding do not signifies-
- The degree of relationship between the individuals parents.
 - Probability of two genes at any locus being identical by descent
 - Fixation of alleles
 - Mutation rate in genes
128. Integrated solution for automatic milk collection, 'AKASHGANGA' has been established by-
- NDDB, Anand
 - NDRI, Karnal 
 - IVRI, Izatnagar
 - NABARD, Mumbai
129. The process by which an individual is connected into one's social and cultural world is known as-
- Acclimatization
 - Socialization
 - Social Inheritance
 - Social Mobility
130. The position of the sigmoid flexure of the penis is prescrotal in which species?
- Bull
 - Rann
 - Boar
 - Stallion
131. The act of mating in sheep is called as-
- Coupling
 - Serving
 - Covering
 - Tupping
132. Consider the names of following exotic goat breeds-
- (1) Saanen
 - (2) Anglo Nubian
 - (3) Toggenburg
 - (4) Boer
- Which of the above breeds have their origin in Switzerland?
- 1 and 2
 - 1 and 3
 - 2 and 3
 - 2 and 4

133. The functional kidneys of mammals and birds (higher vertebrates) are -----
- Pronephric
 - Metanephric
 - Mesonephric
 - Opisthonephric
134. Karan Swiss breed was evolved from crossing which cattle breeds?
- Red Sindhi and Brown Swiss
 - Tharparkar and Brown Swiss
 - Red Sindhi and Tharparkar
 - Sahiwal and Brown Swiss
135. Adulteration of milk with formalin can be detected using ----- test.
- Rosolic acid 
 - Turbidity
 - Hehner's
 - Alkaline phosphatase
136. The increased synthesis of second messenger, c-AMP from ATP is associated with-
- Activation of IP_3
 - Activation of phospholipase-C by inhibitory G-protein
 - Activation of phospholipase C by stimulatory G-protein
 - Activation of adenylate cyclase enzyme by stimulatory G-protein
137. Which of the following is a physiological cause of anestrus in animals?
- Uterine prolapse
 - Bacterial infection
 - Lactation
 - None of the above
138. In cattle, the supraorbital foramen is located in -----.
- Maxillary bone
 - Frontal bone
 - Palatine bone
 - Premaxilla bone

139. Percent contribution of India's milk production to world's total milk production during 2022-23.
- 15
 - 20
 - 25
 - 27
140. The average of ----- feeding standards have been accepted for Indian Livestock.
- Morrison's feeding standards
 - Wolt's feeding standards
 - Grouven's feeding standards
 - Armsby feeding standards
141. ----- is caused by the constant inhalation of coal dust which results in its accumulation in the lungs giving the disease the name, black lungs.
- Anthraxis
 - Asbestosis
 - Silicosis
 - Bagassosis
142. Lysis of blood clot by degradation of fibrin is brought about by-
- Plasminogen
 - Plasmin
 - Thrombin
 - Prothrombin activator
143. Urban societies are characterized by-
- Homogenous nature
 - Primary relations
 - Unity and uniformity
 - Secondary relations
144. ----- was first synthesized by O. Zeidler in 1874 and its dermal absorption is very limited.
- Hexachlorocyclohexanes (HCH)
 - Dichlorodiphenyltrichloroethane (DDT)
 - Endosulfan
 - Chlordecone
145. In India, the most common type of family system is-
- Patrilocal
 - Matrilocal
 - Matrilineal
 - Polyandrous

146. What is the main function of lipids in animal nutrition?

- A. Provide structural support
- B. Supply energy
- C. Act as enzymes
- D. Aid in digestion

147. The system of grazing whole pasture is fenced into convenient number of subunits and are subjected to grazing in rotation at suitable interval is known as ----- grazing.

- A. Rotational deferred
- B. Deferred
- C. Controlled continuous
- D. Rotational

148. A young chicken of either of sex below 8 to 10 weeks of age weighing around 1.5 to 2.0 kgs with tender meat is known as-

- A. Roaster
- B. Pullet
- C. Fryer
- D. All the above

149. Pregnancy diagnosis techniques in farm animals include-

- A. Rectal palpation
- B. Ultrasonography
- C. Body temperature
- D. A and B both

150. Match the List 'I' with List 'II'.

List 'I'

List 'II'

- | | |
|-------------------|-----------------------------------|
| (1) Wheat Straw | (a) Production type roughage |
| (2) Maize grain | (b) Non maintenance type roughage |
| (3) Soyabean meal | (c) Energy rich concentrate feed |
| (4) Legume fodder | (d) Protein rich concentrate feed |

Choose the correct answer from the options given below-

- A. 1-a, 2-c, 3-b, 4-d
- B. 1-b, 2-c, 3-d, 4-a
- C. 1-b, 2-a, 3-c, 4-d
- D. 1-d, 2-c, 3-b, 4-a

Space For Rough Work / रफ कार्य के लिये जगह
